Col. Goss —

As we spoke this afternoon, pertaining to what I saw, I am putting it in writing.

Saturday morning, I got home about 1:15 or 1:20 AM. I opened my apartment door, called my dog and took her up to the roof to do her duty. While waiting, I walked to the front of the roof, looking across the playground toward the 9th Precinct, which is on East 5th St. While looking across the playground, which extends from East 4th St. to East 5th St., I saw a flash of a shining object, as though on its upward surge which looked something like an oversized fire hydrant. The nose of the object seemed to have waves or wavy in order to be able to cut through the air. (As I figure it)

Behind the nose, was like a wide belt with a square on it. To me it looked like a belt buckle. But later realized it may have been a door.

The rest of the object seemed to have pipes extending to the very end. But these pipes seemed to have been cut

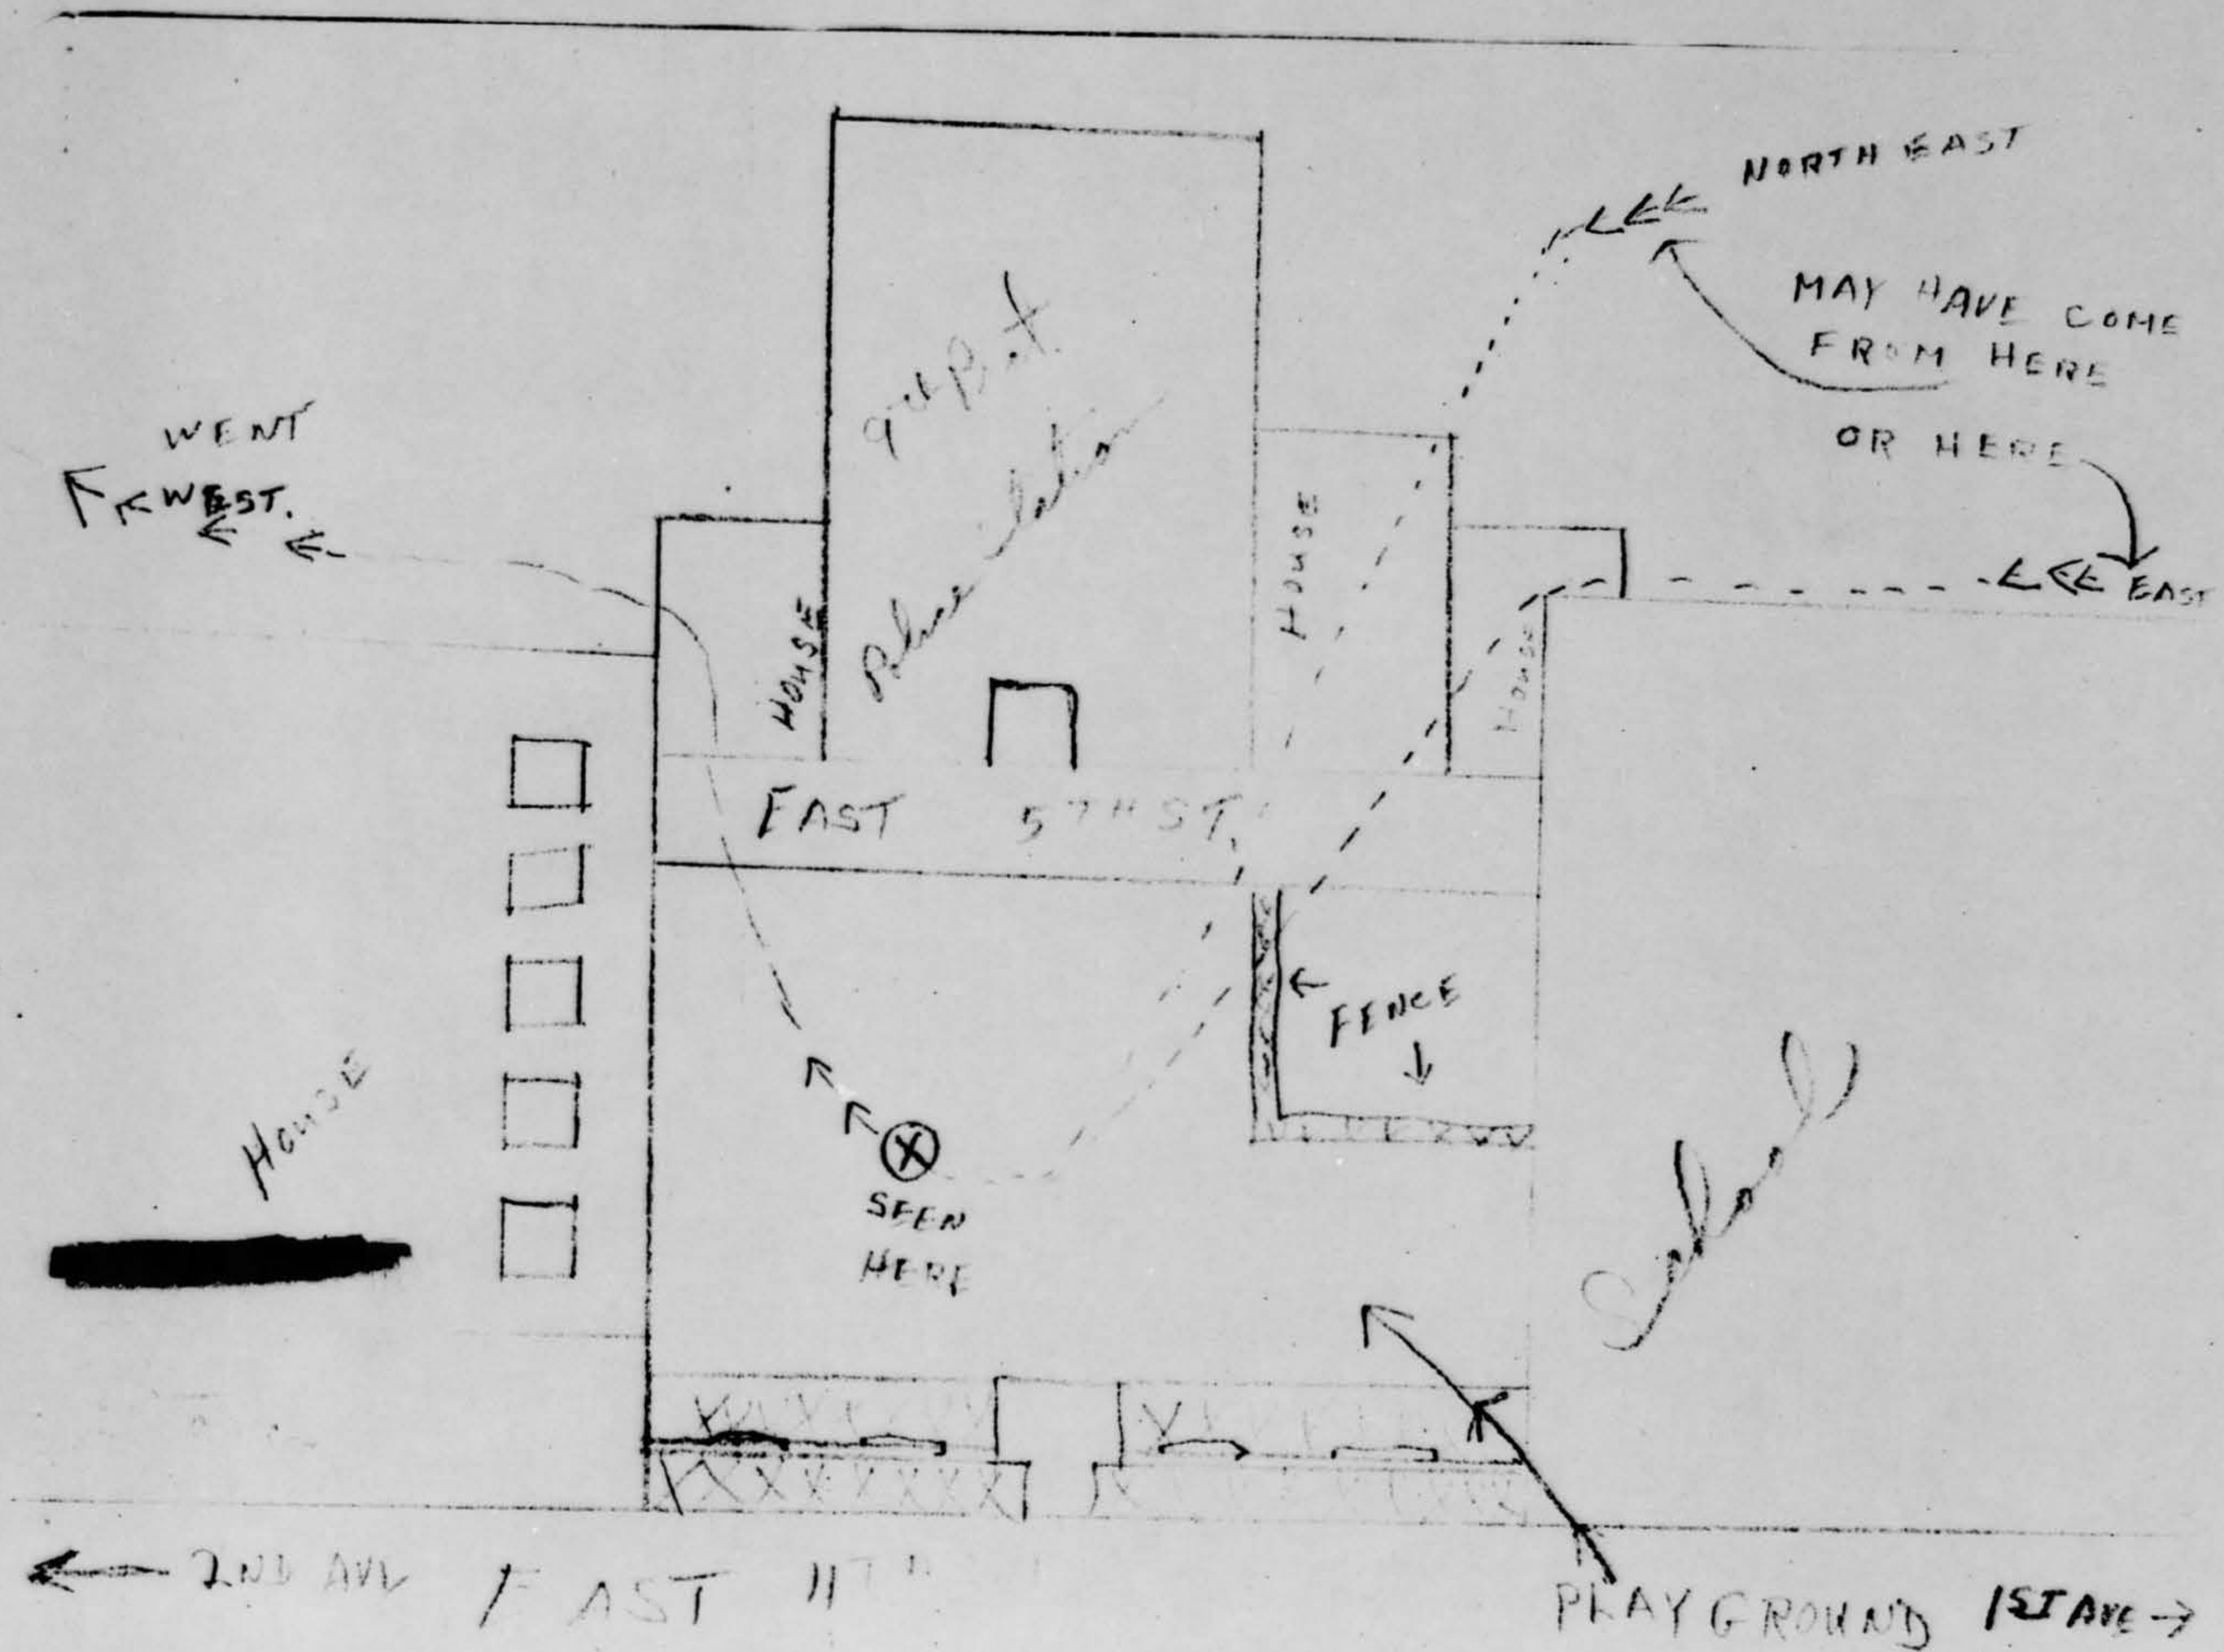

lengthwise down the middle and attached to the body of the object. The front end of the pipes seemed to be cut on a 45° angle as though for air to pass through. There was no flame, fire or smoke.

As I saw it all I seemed to hear was a "Whishhh", then lines or as you said a blur, as though in comics when anything goes by at terrific speed, going up and over the roof tops toward the west (I felt as though I'd see a ghost. Col. Goss, I was scared, especially when my dog growled and looked the same way as I was) I remember that it came about 2 or 3 floors above the ground. It shined as though it were made of chrome or nickel.

Col. Goss, that's my story of what I saw. I hope there is nothing to it, but nowadays nothing is impossible.

Sincerely,
